

PARTNERSHIP INVITATION

Beloved Friend,

"No dream is too big. No challenge is too great. Nothing we want for our future is beyond our reach" - Donald Trump

Thank you for taking the time to read our one-page introductory letter, we are both honoured and humbled to come to know you as a patriot for the wellbeing of the minority groups in South Africa. We, as the United Liberty Alliance (ULA), being pro-President Trump and his administration and decidedly a populist organisation, truly value you as a like-minded international game-changer!

In short, we are not a political party, we are a civil rights organisation fighting, with you, for the safety, freedom and prosperity of the oppressed minority groups in South Africa - at no cost whatsoever! We have a very competent international legal body, consisting of local and international advocates and lawyers, to make the agreed "1994 Afrikaner Self-determination Accord", which is fundamentally embedded in the SA Constitution an enforced reality.

We follow the legal international law process for secession (two-state solution); our process is already handed in and accepted by the UN Secretary General and activated by the UN High Commissioner of Human Rights. We, as a legal body, started this legal process in 2014, which is now 97% complete and growing exponentially under the minorities in SA as well as the expats abroad desiring to return to South Africa. This is proven by the mandate counter on our [website](#).

The primary objective of this short introductory letter is to invite you to form a support role partnership alliance with ULA to secure our own agreed and long-expected sovereign country as a reality for the sake of ourselves as minority groups and our progeny. The current SA political parties have taken little or no interest in this situation, leaving the minorities in dire straits. All we request from you is to stand in agreement with ULA in support of our cause to make the legal new country a reality, by merely adding yourself as an alliance partner on <https://www.ulacongress.com/alliances/> (Alliance type 1).

No other commitment or obligation, other than this motion from your part, will apply.

May we therefore, as a patriotic pro-minorities body, humbly ask your hand in partnership?

To familiarize yourself about the ULA and its process, please feel free to read further in the addendum below and /or visit our website at <https://www.ulacongress.com>. We anticipate your much valued response.

With sincere respect and the desire to foster unity,

Hein Marx
President ULA

Elroy Baron
Vice-President ULA

ADDENDUM

Minority groups of South Africa: There is HOPE!

Secession for survival

South African minority groups are struggling for survival. Corruption, state capture, discrimination, BBBEE (Broad Based Black Economic Empowerment), an onslaught on minority languages and culture, unsound judicial system, crime, farm attacks and murders are creating intolerable conditions.

There is only one peaceful and sustainable solution: secession (break-away and establish your own country).

Did you know about the Accord?

Genl. Constand Viljoen negotiated the International Self-determination Accord of 1994, which was signed just before the ANC came into power. This Accord specifically provides for self-determination of minority groups in South Africa.

Since then, the feasibility of the concept has been greatly ignored, and our very awareness of the existence of the document has faded. Our constitutional right to self-determination, as laid out in the Accord, has been systematically obscured by political rhetoric.

Self-determination and secession in a nutshell.

Most South Africans are not aware of the international practice of secession. Skeptics dismiss the United Liberty Alliance's activities and legal process as merely a 'dream'. However, secession is a lawful, legal, and internationally acceptable legal process that has been practiced by international communities for centuries. Several contemporary countries exist today due to successful legal secession. In the 1950s there were only 95 countries in the world. The number has increased to 195, with more countries in the process of secession.

Examples of countries which have successfully seceded:

1. America (13 American colonies) seceded from Great Britain (1776)
2. South Sudan left Sudan (2011)
3. Baltic republics left the Russian Federation (1990)
4. Algeria left France (1962)
5. East Timor left Indonesia (2002)
6. Austria left Nazi Germany (1945)
7. Eritrea left Ethiopia (1991)

8. Bangladesh left Pakistan (1971)
9. Finland left the Russian Soviet Federal Social Republic (1917)

Self-determination comes about when citizens insist on incorporating their cultural expectations into their own sovereign government to no longer be at the mercy of a corrupt foreign majority in their own territorial area. Therefore, secession is the ideal future for South Africa's minority groups.

The oppressed minority groups in South Africa include:

1. The Khoi and San indigenous people of South Africa.
2. Descendants of settlers from Europe, the British Isles, the international Jewish community and even North Americans who settled in South Africa after 1652.
3. The descendants of slaves and indentured workers who were brought to South Africa before 1900, mainly from Malaysia, India, and Indonesia.

Who is the United Liberty Alliance (ULA)?

The ULA is a civil rights movement and is staffed by unpaid volunteers including legal professionals. Our sole focus is to realize self-determination for South African minorities through alliances with like-minded minority groups. The preparation phase for the legitimate withdrawal from the Republic of South Africa has been concluded over the past six years.

The process has now reached the execution stage, which entails proving that there is substantial and sufficient support for secession. All we need now is two million YES votes, to force the ANC government to call a referendum.

What is the ULA's vision for a peaceful future?

The ULA and affiliations work towards a free, just society where minority groups can enjoy their basic human rights, without domination and oppression by a culturally foreign majority group. Secession means the establishment of independent regions where minorities will be in the majority.

Who will benefit from the ULA's work?

The ULA is an umbrella body unifying minority organization through a common goal of self-determination and self-governance. The ULA's aim is to harness the common denominator among the myriad of small political parties, civil rights organizations, and security movements, to achieve independence from South Africa. The ULA exhorts every minority political, civil or security group to stand together. Help us to achieve the only remaining solution for a peaceful future.

How will the ULA achieve this remarkable goal?

A manifesto with the first 123 000 signatures has already been delivered to the US Congress and the United Nations. Also, the Secretary General of the UN has personally responded to the president of the ULA, Mr. Hein Marx, via email confirming that he has referred our minorities case to the UN High Commissioner of Human Rights for investigation.

Implementation of the ULA's secession plan - next steps:

1. Recognizing the role and activities of the multitude of existing minority-organizations.
2. Promoting mutual respect and collaboration between these different groups.
3. Creating a forum where each group can represent their own people, to achieve cooperation at an unprecedented level.
4. Obtaining a mandate of two million votes to pursue secession.
5. Establishing a Congress of Representatives for planning an orderly and peaceful withdrawal of named regions.
6. Establishing shadow governments in each region in preparation for independence.
7. Mobilizing international recognition for legal secession.
8. Facilitating the democratic independence referendum.
9. Leadership during the transition to independence by the Congress of Representatives and in collaboration with the international community.
10. The drafting of the constitution and key policies of the new independent state or states.

How can I get involved?

First: Choose freedom and prosperity over oppression by simply voting here:

<https://www.ulacongress.com/>

Your vote is confidential and non-enforceable. Remember, this initial voting process is like signing a petition to register your urgent interest in independence. According to international law and acceptable norms we require two million votes to enforce a referendum, or have it enforced.

Your vote is not yet an official referendum vote, it is only the first step to a referendum to enforce our independence from South Africa.

Do not hesitate. Do not be intimidated by the need for faux political correctness. Stand up for yourself, your family, the elderly and future generations. Convince every organization you belong to, to get in touch with other groups right away. Convince your political leaders to talk to the ULA.
